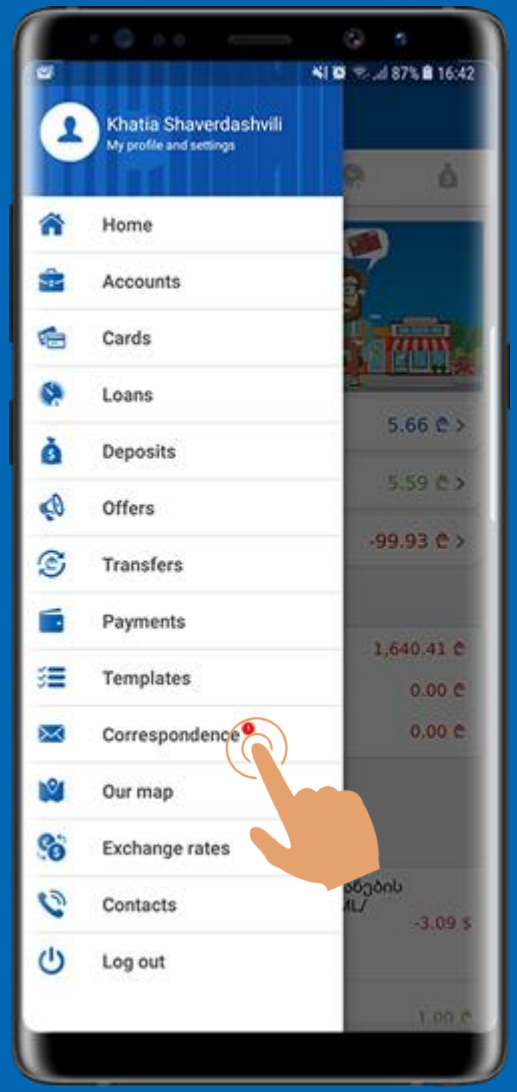
Mobile Digipass of BasisBank

DigiPass in Mobile Application of BasisBank!

BasisBank Mobile Digipass

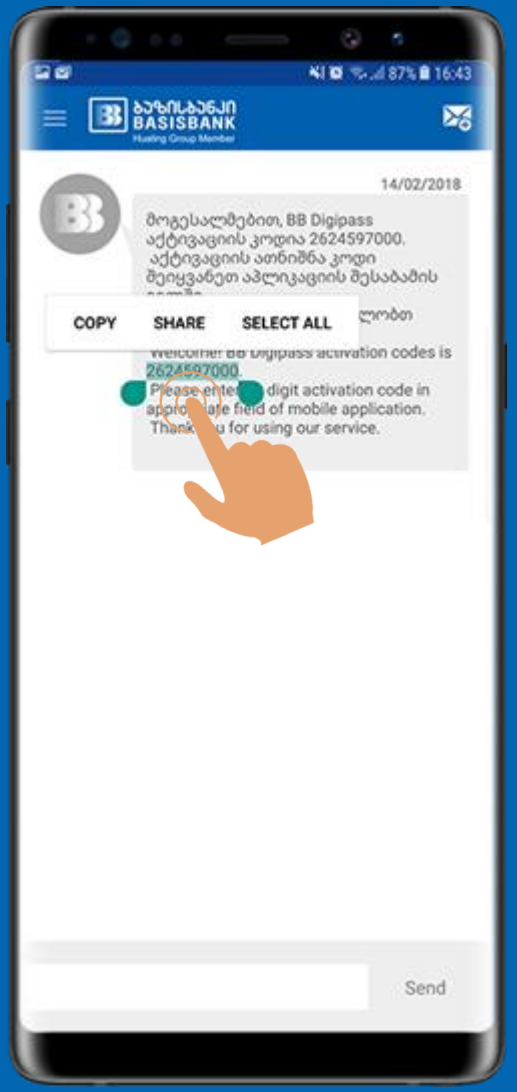
Digipass provides you with opportunity from any point of the world without internet connection to generate one-time codes. With one-time codes you can make unlimited payments and transfers, remotely, and receive variety of banking services without visiting the bank.



For activation of Digipass visit our Service Centre, and you will receive notification with 10 digits activation code.

1 First of all click on “Correspondence”

Copy activation code from received massage 2



3

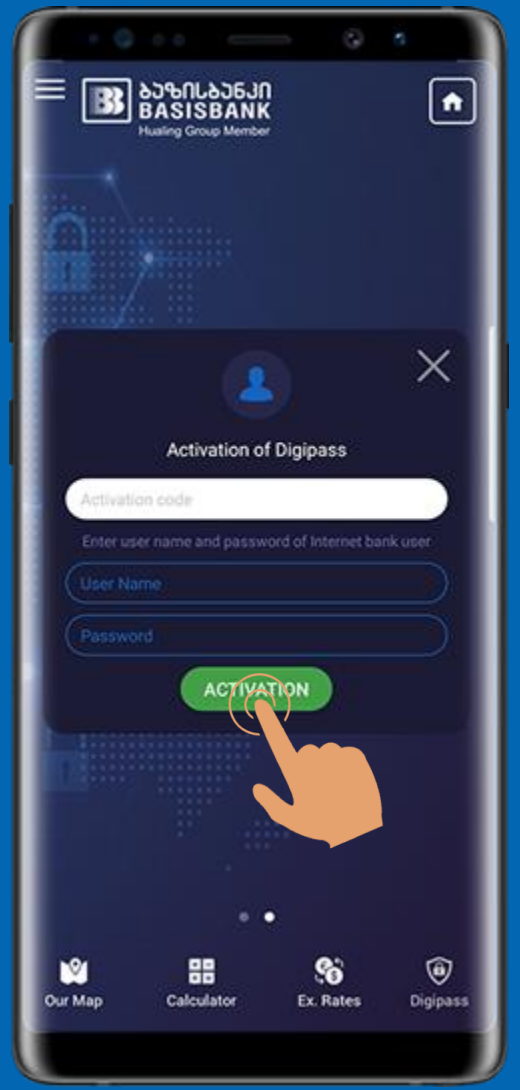
Digipass page

4

Add a Digipass

5

Enter activation code, user and password of Internet Bank



6

Enter 4 digit passcode

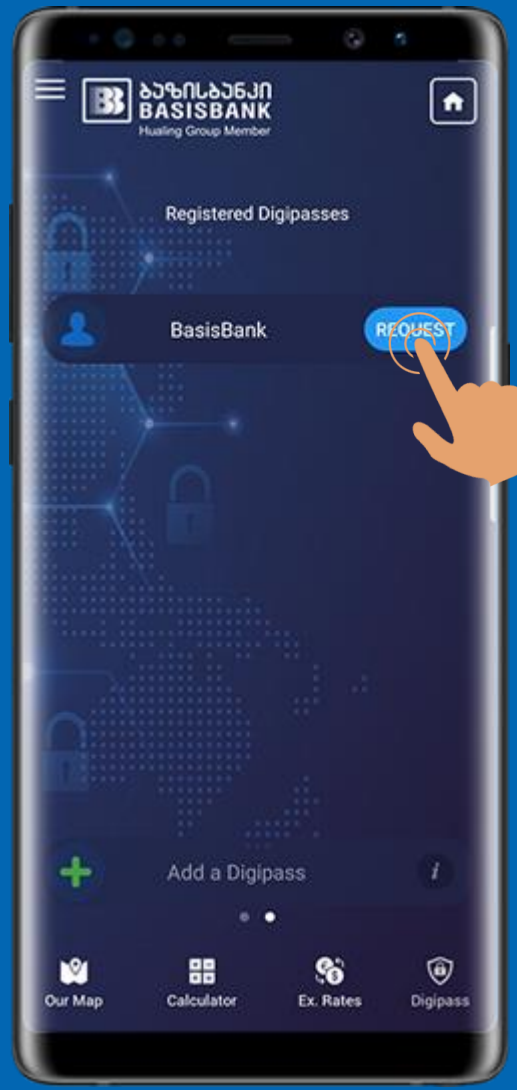
(PIN code shall not be primitive)

4

Confirm the passcode code

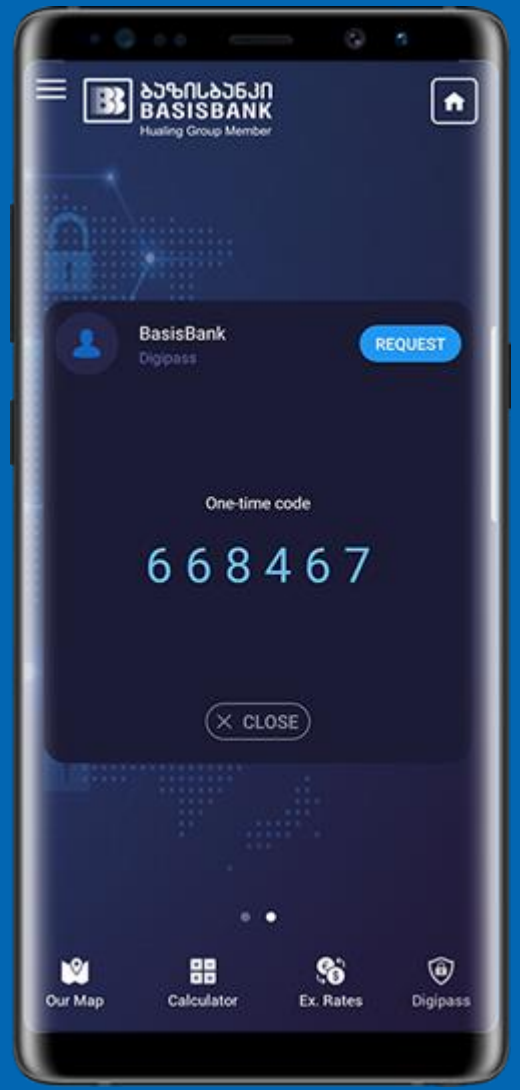
5

Registration is complete.



For generation of one-time code press the button „request“, specify passcode used during the registration

6 digit one-time code will appear on your screen



In case of incorrect entering of passcode one-time code will be generated in any case, but such code is improper. In case of incorrect entering of the code 5 consecutive times your Digipass will be blocked and for unblocking call *9292 or visit the Bank

For activation of Digipass is required internet connection, but further for the code generation internet connection is not required

By pressing the Digipass button for a long time you can change the name or delete Digipass

You can add more than one Digipass

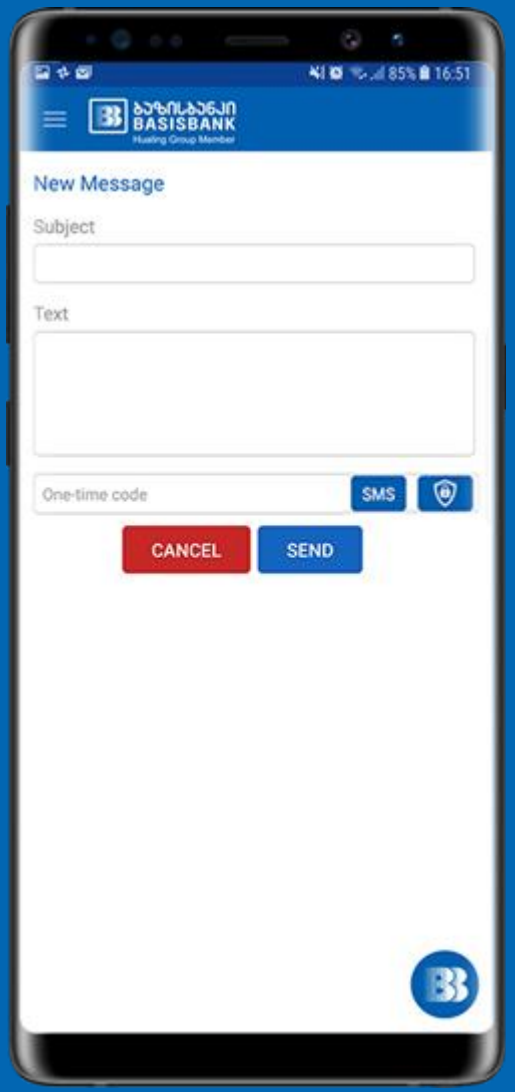
In case of deleting mobile application your registered Digipasses will be deleted as well and new activation is required

How to use Digipass in Mobile Bank

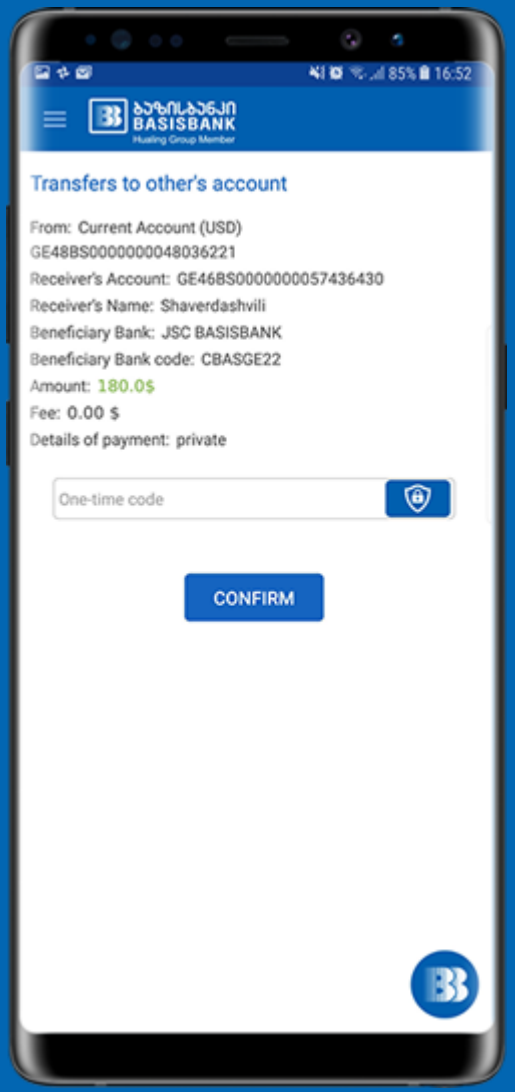
You can use Digipass in Mobile Bank for services:

Authorization with one-time code

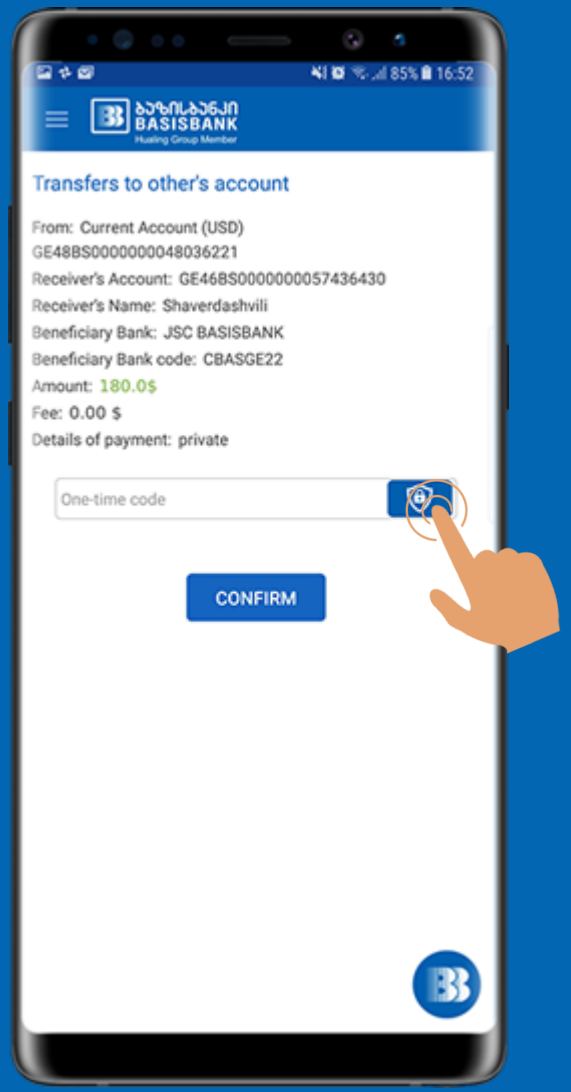
Compose new Message



In transfers



Press Digipass button



Specify Passcode

One-time code will be generated in appropriate field automatically
